SKILLS

- C++ • Python
- React • Javascript
- NodeJS • ExpressJS
- MongoDB • SQL
- Django • Linux
- Git , Github
- Redux • TypeScript
- Problem Solving
- Machine Learning
- React Native • NextJs

ACHIEVEMENTS

1) 3* coder at Codechef with highest rating of 1659
2) In Leetcode with highest rating of 1607

CERTIFICATES

- FullStack-Udemy
- Supervised Machine Learning-Coursera
- Javascript-Cisco
- Linux-Cisco
- Python for DataScience-IBM
- Problem Solving -HackerRank
- Python-HackerRank
- Java-HackerRank
- C++-HackerRank
- C-HackerRank

PROFILE

I'm an enthusiastic intern with a passion for web development. I'm skilled in ReactJS, and Node.js, and I love collaborating with teams to build user-friendly web applications. I focus on writing clean, easy-to-understand code and making sure everything works smoothly. I'm also familiar with technologies like Python, MySQL, and MongoDB, which I use to create efficient back-end solutions. I'm always eager to learn and stay updated with the latest trends in web development, and I'm ready to contribute to any project with my dedication and enthusiasm.

PROJECTS

CHATFAST | FullStack

ChatFast is an innovative web application designed to facilitate seamless, real-time conversations between users. Leveraging the power of web sockets, the platform enables dynamic communication where two individuals can engage in lively discussions using a combination of emojis and text. With a user-friendly interface, ChatFast provides an intuitive chatting experience, ensuring fluid interactions and quick responses.
- Tech Stack: ReactJs, NodeJs, MongoDB

FACING OBSTACLES | Python

Facing Obstacles is an exciting game made with Python's TURTLE library. Your goal? Navigate through a tricky maze of obstacles while beating the clock. But watch out! You need to keep your character safe from harm as you rush to finish each level. It's all about quick reflexes and smart moves in this adrenaline-pumping adventure!
- Tech Stack: Python,Turtle

PFM | FullStack

PFM is a helpful website that lets you manage your money better. It helps you keep track of how much money you make, what you spend it on, how much you save, and even where you invest it. By using PFM, you can get a clear picture of your finances and make smart decisions to reach your financial goals. It's like having a personal financial advisor right at your fingertips!
- Tech Stack: NodeJs, MongoDB, Ejs, HTML,CSS, Javascript
- Live Link • Repository Link

OTP-VERIFICATION | FullStack

Otp-Verification is a website that makes sure a mobile number belongs to the right person by sending a special code to it. This code is called OTP (One-Time Password). We use a service called Twilio to send this code. When the person receives the code and types it in, if it matches the one we sent, they can access the website's main page. But if it doesn't match, we show a message saying the code is incorrect. It's like giving the person a secret key to unlock the website!
- Tech Stack: NodeJs, MongoDB, Ejs
